

Nobel

Year 7

Super Curriculum

The Nobel Super Curriculum

In this booklet, you will find a range of challenges that encourage you to think about the learning that you can do outside of your lessons to become a more active learner.

Whether you are applying your artistic skills to develop a sketchbook, developing code breaking skills in Maths, or creating a tasty meal for your family using seasonal foods, we hope that these activities inspire you to think about your learning in new ways. You might even be able to teach the staff a thing or two!

A key characteristic of a successful student is independence. If you can tackle these activities, you will be demonstrating your ability to think for yourself and to take responsibility for your learning. Developing this will help to make sure that you are prepared for the GCSE courses and beyond.

Equally, we think that it is important to reflect on your learning by talking about it. Try to involve your family when you complete some of these tasks like visits to museums and watching live theatre.

We hope that you have fun attempting these challenges and find that they give you a fresh perspective on the subjects that you learn.

If you complete any challenges for a subject, please let your teacher know so that you can be rewarded. There will be prizes for students who finish all of the activities for a particular subject.

Good luck!
