

Subject: English Language

Level: A Level

Exam Board: AQA

Course Outline

This course offers opportunities for students to develop their subject expertise by engaging creatively and critically with a wide range of texts and discourses. Students will create texts and reflect critically on their own processes of production, while analysing the texts produced by others.

The course explores the study of English Language both as a medium of communication and as a topic in its own right, with an emphasis on the ability of students to pursue lines of enquiry, debate different views, and work independently to research aspects of language in use. Language is seen as a creative tool for expression and social connection, as well as for individual cognition. The study of language as a symbolic system used to assert power in society is also fundamental to the scope of this specification.

This specification draws academic insights from a range of fields within the study of English language/linguistics, including sociolinguistics and discourse analysis.

Course Content
