

Geography Summer Tasks

Geography A level contains several different topics:

Paper 1	Paper 2	Paper 3	NEA
Coasts	Changing urban areas	Climate Change	An independent investigation into a fieldwork question
Carbon and Water Cycles	Global Migration	Tectonic Hazards	
	Geopolitics		

There are three articles here, one from paper that you need to read and write responses to the questions, you can do this on paper or type.

Storm Damage and Coastal Protection Article

1. Either print or sketch a map of the UK with Chesil Beach marked on.
2. List the sea defences that are present in the area
3. Chisel Beach is an example of a tombolo – explain what a tombolo is and how it is formed, diagrams will help you with this.
4. Summarise the damage caused by the storms in 2014

What Causes Labour Migration? Article

1. How many migrant workers were there in 2019?
2. Explain what migration infrastructure has been created by the Philippine government
3. What problems/benefits are there to migration? Create a table like so and add points, make sure to include “brain drain” and “remittances”

Philippines Benefits	Philippines Problems	Rest of the world Benefits	Rest of the world Problems

An island Shattered

1. Find a map of Haiti that includes the tectonic plate boundaries near to it, explain why Haiti is at risk of earthquakes
2. Write a response to this question, write at least 500 words and include why people may have different views to you.

The disaster in Haiti was the fault of people not nature” do you agree?
